| -MongoDB     | -Agile/Scrum |
| -Express     |              |

### ACADEMIC HIGHLIGHTS

#### BoiseCodeWorks

Full-stack Software Development  
Graduated in 2020  
- Certificate of Completion

#### Boise State University

AAS in Computer Service Technology  
Graduated 2006

### PROFESSIONAL CAREER

#### Full-Stack Software Developer

BoiseCodeWorks | 2020

- Participated in multiple group projects including in a leadership role
- Completed many solo projects, going beyond MVP and always within the deadline
- Expedited the learning process, gaining demonstrable experience in multiple languages in shortened time-frames
- Understood the importance of refactoring code and making clean, efficient, encapsulated components.

#### Supervisor, Prep/Lobby

Idaho Pizza Company | 2019

- First Awarded Employee of the Month during second month of work
- Promoted to Supervisor within 6 months
- Managed a small crew of employees in a restaurant environment
- Handled tills and bank deposits, prepping food for use, ordering and maintaining inventory, and care of customers

#### Customer Support Technician

World Connection | 2016-2018

- Handled calls, emails, and chats from clients about Quicken software and the app from Personal Capital in Windows and Mac environments
- Recognized as Subject Matter Expert and took over others' difficult calls
- Wrote Knowledge Base articles to help fellow agents
- Earned performance bonuses nearly every cycle

### PROJECTS

#### Keepr

- A "Pinterest"-inspired solo project where users can create a profile and post and save content publicly or privately and arrange in collections.
- Built using C# .Net WebAPI in the Repository pattern, MySQL for the database, Vue.js with Vuex, and Dapper as an ORM.

#### Echo

- A social media app where users can vote on topics and engage in conversations with like-minded people with real-time updates.
- Group project with 4 members utilizing Scrum methodology
- Built using Vue.js, SASS/CSS, Socket.io, and a Discord webhook.
